## Connection guide

## Connecting to EasyLynq

- Using your favorite browser, connect to Apaleo store and navigate to EasyLynq app at <https://store.apaleo.com/easylynq>
- Press the "Connect to apaleo" button.

The screenshot shows the Apaleo website's navigation bar with links for platform, app store, partners, pricing, company, learn, and store logout. Below the navigation bar is the EasyLynq logo and the title "EasyLynq Hotel". A "Connect to apaleo" button is visible. The page lists various categories such as Guest communication, Hotel operations, Miscellaneous, and Analytics & BI. A list of features is provided, including multi-complex management, interoperability, and various service options. At the bottom, there are additional links for visiting the website, support, and documentation. A screenshot of the EasyLynq interface is shown, displaying a "Rooms listing" window for "Complex Hotel Mayflower".

- If not logged in yet, you will be required to login.
- Accept and authorize the connection to EasyLynq.
- Acknowledge information will be shown:

#### EasyLynq

Thank you for selecting our product to help you in your hospitality operations.

An email was sent to our integration channel with your request for integration.

## Disconnecting from EasyLynq

- Connect to your Apaleo dashboard.
- Navigate to "Apps - Connected apps" and press "Disconnect app".
